GUIDELINES FOR OPENING UP - IDAHO SYNDROMIC CRITERIA

Downward trend or low numbers of COVID-19-like illness patient visits as tracked by Emergency Departments within a 14-day period.

**METRIC:** Downward trend over most recent reported 14-day period, OR less than 20 visits/day on average over same 14-day period

The number of ED visits for COVID-19-like illness during April 27 - May 10 trended downward.

AND

Downward trend or very low numbers of patients with COVID-19-like illness admitted from Emergency departments within a 14-day period.

**METRIC:** Downward trend over most recent reported 14-day period, OR less than 2 patients/day on average over same 14-day period

The number of ED patients with COVID-like illness admitted to the hospital during April 27 - May 10 trended downward.

*Note:* All data are provisional and subject to change. Metrics measured using the most recently available data for the specific metric resulting in the "most recent 14-day period" referenced to vary by metric.
GUIDELINES FOR OPENING UP - IDAHO EPIDEMIOLOGIC CRITERIA

Downward trend or low levels of documented COVID-19 cases reported within a 14-day period. **METRIC:** Downward trend over most recent reported 14-day period, OR less than 20 patients per day on average reported statewide over the same 14-day period.

The number of reported cases during April 29 - May 12 trended downward.

**Number of Cases by Report Date**

*For entrance into Stage 1 metrics, “Event Date” was used. Report Date is now used for ease of interpretation. This change did not impact overall trend reported for entrance into Stage 1.*

OR

Downward trend of positive COVID-19 PCR tests as a percent of total tests within a 14-day period (including flat or increasing volume of tests). **METRIC:** Downward trend over most recent reported 14-day period, OR less than 5 percent laboratory PCR positivity on average over same 14-day period.

The percent of positive PCR tests during April 29 - May 12 trended downward.

**Positive PCR Tests as a Percent of Total by Specimen Collection Date**

*Note: All data are provisional and subject to change. Metrics measured using the most recently available data for the specific metric resulting in the “most recent 14-day period” referenced to vary by metric.*
GUIDELINES FOR OPENING UP - IDAHO HEALTHCARE CRITERIA

Treat all patients without needing to use crisis standards of care **MEASURED BY:** Governor’s Order for Crisis Standards of Care in place; reports from hospitals.

All patients are being treated **without** needing to use crisis standards of care

**AND**

Available ventilators, intensive care unit beds, and personal protective equipment (PPE) to safely care for additional COVID-19 patients in hospitals. **METRIC:** At least 50 available (unused) ventilators, 50 ICU beds, and available 10-day supply of N95 masks, surgical masks, face shields, gowns, and gloves.

There were at least 50 ventilators and at least 50 available ICU beds available during April 29 - May 12.

**AND**

There was at least a 10 day supply of PPE during April 29 - May 12.

*Note:* All data are provisional and subject to change. Metrics measured using the most recently available data for the specific metric resulting in the “most recent 14-day period” referenced to vary by metric.
Robust COVID-19 testing program in place for at-risk healthcare workers. **METRIC:** Downward trend over most recent reported 14-day period, OR less than 2 healthcare workers reported/day on average over same 14-day period.

The number of HCWs reporting onset of symptoms during April 29 - May 12 trended downward.
