

# Idaho Criteria for Opening Up: January 14, 2021

IDAHO EPIDEMIOLOGIC CRITERIA - STATUS: MET

Downward trend or low levels of documented COVID-19 cases reported within a 14-day period. **METRIC:** Downward trend over most recent reported 14-day period, OR less than 20 patients per day on average reported statewide over the same 14-day period

The number of reported cases during December 29 - January 11 trended downward but was greater than 20 cases per day on average.

Number of Cases by Report Date

OR

Downward trend of positive COVID-19 PCR tests as a percent of total tests within a 14-day period (including flat or increasing volume of tests). **METRIC:** Downward trend over most recent reported 14-day period, OR less than 5 percent laboratory PCR positivity on average over same 14-day period

The percent of positive PCR tests during December 27 - January 9 trended downward. The average percent positivity for the prior 14-day period was greater than 5% at 14.28%.

Positive PCR Tests as a Percent of Total by Specimen Collection Date

Note: All data are provisional and subject to change. Metrics measured using the most recently available data for the specific metric resulting in the "most recent 14-day period" referenced vary by metric.

\*Trend direction likely influenced by recent delays in data entry across multiple public health districts.

Available ventilators, intensive care unit beds, and personal protective equipment (PPE) to safely care for additional COVID-19 patients in hospitals. **METRIC:** At least 50 available (unused) ventilators, 50 ICU beds, and available 10-day supply of N95 masks, surgical masks, face shields, gowns, and gloves.

**There were at least 50 ventilators and at least 50 available ICU beds available during December 29 - January 11.**

**Number of Available Ventilators and Intensive Care Unit (ICU) Beds**

**AND**

**Among hospitals reporting, there was at least a 10 day supply of PPE during December 29 - January 11.**

**AND**
