**Idaho Criteria for Opening Up: May 27, 2020**

**GUIDELINES FOR OPENING UP - IDAHO SYNDROMIC CRITERIA**

Downward trend or low numbers of COVID-19-like illness patient visits as tracked by Emergency Departments within a 14-day period. **METRIC:** Downward trend over most recent reported 14-day period, OR less than 20 visits/day on average over same 14-day period.

---

The number of ED visits for COVID-19-like illness during May 11 - 24 trended downward.*

*ED visits from the timeframe May 11 - May 24 were used to ensure the most complete and accurate dataset is available for trendline interpretation.

---

**AND**

Downward trend or very low numbers of patients with COVID-19-like illness admitted from Emergency departments within a 14-day period. **METRIC:** Downward trend over most recent reported 14-day period, OR less than 2 patients/day on average over same 14-day period.

---

The number of ED patients with COVID-like illness admitted to the hospital during May 11 - May 24 trended downward.*

*ED visits resulting in admission from the timeframe May 11 - May 24 were used to ensure the most complete and accurate dataset is available for trendline interpretation.

---

*Updated: 5/27/2020

**Note:** All data are provisional and subject to change. Metrics measured using the most recently available data for the specific metric resulting in the "most recent 14-day period" referenced to vary by metric.
Downward trend or low levels of documented COVID-19 cases reported within a 14-day period. **METRIC:** Downward trend over most recent reported 14-day period, OR less than 20 patients per day on average reported statewide over the same 14-day period.

The number of reported cases during May 13 - 26 trended downward.

Downward trend of positive COVID-19 PCR tests as a percent of total tests within a 14-day period (including flat or increasing volume of tests). **METRIC:** Downward trend over most recent reported 14-day period, OR less than 5 percent laboratory PCR positivity on average over same 14-day period.

The average percent of positive PCR tests for the prior 14-day period during May 11 - 24 was **3.37%, less than the 5% metric threshold.**

*Note:* All data are provisional and subject to change. Metrics measured using the most recently available data for the specific metric resulting in the "most recent 14-day period" referenced to vary by metric.

GUIDELINES FOR OPENING UP - IDAHO HEALTHCARE CRITERIA

Treat all patients without needing to use crisis standards of care **MEASURED BY:** Governor’s Order for Crisis Standards of Care in place; reports from hospitals.

All patients are being treated **without** needing to use crisis standards of care

AND

Available ventilators, intensive care unit beds, and personal protective equipment (PPE) to safely care for additional COVID-19 patients in hospitals. **METRIC:** At least 50 available (unused) ventilators, 50 ICU beds, and available 10-day supply of N95 masks, surgical masks, face shields, gowns, and gloves.

**Number of Available Ventilators and Intensive Care Unit (ICU) Beds**

There were **at least 50 ventilators and at least 50 available ICU beds available during May 13 - 26.**

AND

There was **at least a 10 day supply of PPE during May 13 - May 26.**

*Note:* All data are provisional and subject to change. Metrics measured using the most recently available data for the specific metric resulting in the "most recent 14-day period" referenced to vary by metric.

Updated: 5/27/2020
The number of HCWs reporting onset of symptoms during May 13 - 26 trended downward.

OR

Fewer than 1 HCW per day on average had onset of symptoms during May 13 - 26, less than the threshold of 2 HCWs per day on average.
